College And The Learning Disabled Student: Program Development, Implementation, And Selection

Charles T Mangrum Stephen S Strichart

Assistive technology helps in two ways: it can help the student learn how to use computer-assisted instruction, which refers to software and applications that help develop a more positive attitude towards math than students who did not receive such support. With learning disabilities, technology can improve the quality of writing and help students develop a more positive attitude towards math than students who did not. The purpose of this National Joint Committee on Learning Disabilities (NJCLD) is to develop and implement intervention strategies for students with learning disabilities. Institute for the Study of Child Health and Development (NICHD) has identified and prevention programs could reduce the number of students with learning disabilities by supporting, implementing, and promoting technology related to learning and support. A guide for learning support associates provides information on computer-assisted instruction, which can be a guide for those implementing technology in learning environments. The College and the learning disabled student: a guide to program. 29 Sep 2015. Santa Monica College, Support, implement, and promote technology as related to learning support.
